

**INTERNATIONAL CONFERENCE ON COVERT HARASSMENT EXPOSES
INHUMANE MIND CONTROL EXPERIMENTATION AND ROBOTIZATION OF HUMANITY**

FORUM-Factory, Berlin - Thursday 1 and Friday 2 October 2015

<http://covertharassmentconference.com>

Global surveillance disclosures leaked by ex-NSA contractor **Edward Snowden** have sent planetary shock waves around the globe and outraged the public. In fact, they only represent a small percentage of the numerous illegal activities and programs perpetrated on citizens in the EU and beyond.

"Man does not have the right to develop his own mind. This kind of liberal orientation has great appeal. We must electrically control the brain. Some day armies and generals will be controlled by electrical stimulation of the brain."

- Congressional Testimony of Dr. Jose M.R. Delgado, Director of Neuropsychiatry, Yale University Medical School, 24 February 1974 -

When the infamous CIA mind control program Project MKUltra first came to light by the mid 1970s through investigations of the Church Committee of the US Congress, statements such as Dr. Delgado's congressional testimony, shocked the public. Today, the existence of weapons related to the recording, analysis and interpretation of bio-electric signals from the human organism covertly tested on individuals and the global population is a terrifying reality. It is possible to manipulate moods, read thoughts, as well as, plant thoughts into the human brain that cannot be distinguished from your own unless you are very aware. Also, this weaponry can be used to damage the human body and/or give all kinds of physical pains, without leaving any evidence. Such weapons, operating on new physics principles (often using invisible radio waves and through-wall technology), are used to torture or inflict other cruel, inhuman or degrading treatment and are thus not compatible with the relevant EU Guidelines. **They stand in direct violation of the Charter of Fundamental Rights of the European Union and international conventions and treaties.**

With the support of key-note speakers like **Dr. Nick Begich** amongst other distinguished juridical and technology experts, the STOPEG Foundation (STOP Electronic weapons and Gang stalking), The European Coalition against Covert Harassment (EUCACH), Initiative Gegen Elektromagnetische Folter (IGEF) and STOP Zorganizowanym Elektronicznym Torturom (STOPZET) are now organizing this unique event to stimulate the debate on unethical, non-consensual research and look for solutions to end the abuse.

- **Help us mobilize public opinion to ban weaponry and methods endangering human health and life!**
- **Participate in finding appropriate legal and/or political solutions to protect humanity's right to life!**
- **Say NO to mind control experimentation, many suffer, many die!**
- **Say NO to robotization of humanity, it means the destruction of human autonomy and dignity!**
